Around the World in 2 Billion Pages

Join us in capturing 2 billion pages from around the world! This project is designed to create a unique global snapshot of the Web and to help improve and demonstrate the scalability of the Heritrix web crawler. [The crawl has begun!](#)

Web Archiving Services

ARCHIVING THE INTERNET FOR FUTURE GENERATIONS
COLLECT IT, PRESERVE IT, SEARCH IT...ARCHIVE-IT

[Archive-It](#) is a subscription-based archiving service geared towards a broad range of institutions. The service enables subscribers to capture, catalog, and preserve online material from their own institutions as well as from the world wide web. Users are able to create and access their text searchable collections, without needing technical support or infrastructure.

Current partners include the Library of Congress, Library of Virginia, University of Toronto, University of Southern California, Indiana University and North Carolina State Archives, alongside other respected academic and memory institutions.

[Contact](#) the Archive-It team for more details about subscribing to this service and to learn more about our Curated and Domain Crawl services.

Peter Burden

My Home Page

That is a picture of me on the system home page. (Rank hath it's privileges :-). There are two other pictures of me included in our Web pages, can you find them ??

It seems to be normal practice to put a list of links to other pages on your home page. Here's mine, however it's bit different from other lists in that all the pages linked are my own work or contain a very substantial amount of my own work.

- The SCIT system home page
- The sensitive maps of UK academic and research/cultural sites.
- The WWlib Dewey decimal classified list of UK WWW pages.
- The University of Wolverhampton Personal Development Planner (Pilot Study) - developed in conjunction with Brian Penfold.
- The University of Wolverhampton 1996 On-Line Prospectus - developed in conjunction with Jon Wallis
- Information about Wolverhampton and surrounding area
- Here are my project ideas for final year computer science students.
- An eclectic collection of information about HTML and the WWW that I call the HTML encyclopaedia

Teaching interests and activities (on-line notes)

- Systems Programming Techniques including notes on programming in C
- Communications Systems including notes on Internet and related protocols and sockets programming.

And here are my research related publications

- A paper titled Appropriateness of the Internet as a Teaching Resource presented at the Leading Edge Teaching and Training 1996 (LETT'96) conference on March 20th, 1996. [Jointly with Jenny Davies.]
- Results of a survey on the use of the Internet in teaching the SLAPA module. [Jointly with Jenny Davies.]
- Some notes on the problems of cataloguing the WWW prepared for a Project Raphael workshop on National Home Pages on February 26th, 1996.
- A paper titled Towards a Classification-based Approach to Resource Discovery on the Web published internally. [Jointly with Jon Wallis.]

I am research supervisor for Charlotte Jenkins and Ratvinder Grewal who are investigating aspects of cataloguing and presenting WWW related information and search engine design.

The following pages represent some of my non-professional interests

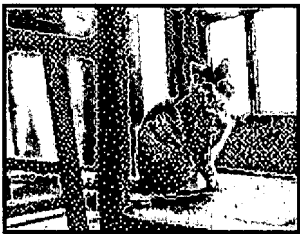

Link
for
Communication
Systems
webpage

- The [RSGB VHF Committee](#) pages. This is a collection of information of interest to the VHF radio amateur.
- [South Shropshire](#) - a collection of text and images about this delightful part of England that is less than an hour's drive from the centre of Wolverhampton.

And finally the following pages are "under development". Do have a look, but expect dangling links, missing pictures, typographical errors etc.

- [Notes](#) for the module CP2015
- [Our Canadian Holiday](#)

And by established local custom here's a picture of the cat. Click on the picture for a full size version.

She's called Gemma by the way.

I once had a letter from [Michael Jackson](#).

Experimental bit does [this work](#)

I have been a radio amateur for many years. If you're interested here are [details](#) of some of the interesting stations I have heard and contacted and here's some more general [amateur radio information](#).

Here's my .sig for further information.

From Peter Burden, University of Wolverhampton Email jphb@scitsc.wlv.ac.uk Phone (+44 902)-321486 (DDI) FAX (+44 902)-322680 <http://scitsc.wlv.ac.uk/~jphb/home.html>
-- <http://scitsc.wlv.ac.uk> is also mine

Communication Systems - CP3340

Information for 1999 Session

- Module Guide
- Class Lists
 - Class List (1998-1999)
 - Class List (1997-1998)
 - Class List (1996-1997)
- Seminar Lists
 - Seminar List (1998-1999)
 - Seminar List (1997-1998)
 - Seminar List (1996-1997)
- Assessment
 - Assessment (1998-1999)
 - Assessment (1997-1998)
 - Assessment (1996-1997)

Notes

- Standards
- The Internet defining RFCs. A complete set experimentally converted into HTML as a student project.
- The OSI 7 Layer model - Notes by Dr.A.Sloane
- A criticism of the OSI 7 layer model
- The X.25 Protocol
- LANs and Ethernet
- Internet Protocol Version 6
- Routing and related topics
 - General Principles
 - Bridges
 - Internet Routing
 - Domain Name Service
- Sockets Programming
- The Transmission Control Protocol (TCP)
- The Telnet Protocol
- The File Transfer Protocol
- The Simple Mail Transfer Protocol
- PC Networking [Converted Power Point Slide sequence by E.Simon]
- Systems Management [Converted Power Point Slide sequence by E.Simon]
- Network File System
